The global Spinel Transparent Armor market size is expected to reach \$ 19.39 million by 2032, rising at a market growth of 7.8% CAGR during the forecast period (2026-2032).

Spinel transparent armor refers to ballistic protection systems based on polycrystalline magnesium aluminate spinel (MgAl_2O_4) transparent ceramics. Through advanced densification and microstructural control, spinel achieves high optical transparency combined with excellent hardness and mechanical strength. It is typically used in multilayer composite armor systems together with glass or polymer backing layers, and is applied in armored vehicle windows, aerospace optical domes, and infrared sensor windows.

In 2025, global Spinel transparent armor production reached approximately 100 MT, average price was 110000 USD/Tons, with gross margin 40%.
