According to our (Global Info Research) latest study, the global Spiral Conveyors market size was valued at USD 336.7 million in 2023 and is forecast to a readjusted size of USD 500.6 million by 2030 with a CAGR of 5.8% during review period.

Conveyors are based on a new and innovative technology, offering many features and benefits. A spiral conveyor needs less floor space than conventional conveyors and are also faster and more reliable than any elevator or lift. Conveyor systems often need to go above, under or around other equipment, walls, walkways, workspaces, and various other obstacles. Although conveyors are traditionally employed for horizontal movement, when a product needs to travel down, spiral conveyors are a top option. They take up a fraction of the floor space compared to a traditional conveyor, resulting in potentially significant financial savings. Spiral conveyors can be used for merging products from a multi-level pick module on to a single takeaway conveyor line. They can also be help accumulate product on the spiral to increase buffer time.

Global key players of spiral conveyors include Ambaflex, Interroll Group, Apollo Group, Tecnopool, Flexlink, etc. The top five players hold a share about 53%. Asia-Pacific is the largest market, has a share about 35%, followed by Europe and North America, with share 27% and 24%, separately.
