The global Spiralweld Pipe market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Spiralweld Pipe: the low carbon carbon structural steel or low alloy structural steel strip is rolled into tube blank according to a certain spiral angle (called forming angle), and then welded together, it can produce large diameter steel pipe with narrow strip steel. The specifications are expressed in terms of outer diameter * wall thickness. Welded pipes shall ensure that the water pressure test, the tensile strength and the cold bending properties of the welded joints conform to the requirements.

This report studies the global Spiralweld Pipe production, demand, key manufacturers, and key regions.
