## Abstracts

According to our (Global Info Research) latest study, the global Split DC Fast Charger market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

Split charging piles are actually relative to integrated charging piles. Integrated charging pile, that is, all the constituent units of the charging pile are integrated. The split charging pile can also be called a group charging system or a flexible charging pile, which consists of a split DC charger and a DC charging terminal. Since the split charging pile designs the charging output and the DC power unit separately, the number of charging guns configured for each DC power unit can be increased to 6 guns, 8 guns, or even 12 guns, etc., thereby achieving the effect of group charging.
