## Abstracts

According to our (Global Info Research) latest study, the global Split Mechanical Seal market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

The split mechanical seal is a seal composed of a circumferentially split or multi-lobed ring (including the rotating ring seat, rotating ring support, rotating ring, stationary ring, stationary ring support, and stationary ring seat), which is connected by a plug pin or clamped by a surrounding spring to form a whole, and is equipped with an open seal ring and an elastic element. Except for the split surface between the sealing ring and the support seat, its working principle and structure are the same as those of ordinary mechanical seals.
