Abstracts

Spool Piece Multiphase Flow Meter can be installed at the wellhead or metering station of a single well to measure the flow of oil, gas and water phases and key process parameters, such as water cut, gas cut, temperature, pressure, etc. online and in real time. Based on mature gamma ray and Venturi technology, it covers single well metering and testing in the range of 0-100% gas content, and can meet the requirements of small volume, high strength and long life at the same time. Haimo Technology has developed exempt source sub-section multiphase flowmeters, which have been exempted from filing by the Ministry of Ecology and Environment. It has the characteristics of no radiation hazard, miniaturization, intelligence, high accuracy, high reliability, versatility and safety. , without going through routine radioactive source management procedures. And it can realize the accurate measurement of gas-liquid flow rate and water content of oil-gas-water three-phase flow under medium and low gas content conditions, and the measurement of gas-liquid flow rate under high gas content (wet gas) conditions. Measurements may also be made using non-exempt sources.
