Abstracts

The global Sportbike Helmet market size is expected to reach \$ 1248 million by 2032, rising at a market growth of 5.4% CAGR during the forecast period (2026-2032).

A sportbike helmet, also known as a motorcycle racing helmet or a sport-oriented motorcycle helmet, is specifically designed to meet the demands of high-speed riding and performance-oriented motorcycling. These helmets are tailored for the unique needs of sportbike riders who often engage in aggressive riding styles, track racing, or spirited riding on twisty roads. In 2025, global Sportbike Helmet production reached approximately 3,408 k units, with an average global market price of around 250 US\$/Unit. The production capacity of Sportbike Helmet reaches 4,300 k units, and the industry's gross profit margin is approximately between 30% and 50%.

Driving factors in the sportbike helmet market include growth in performance motorcycle ownership and track-day/club racing participation, especially among younger riders in emerging and developed markets, which expands the base of users seeking high-spec protective gear. Ongoing tightening of safety standards and homologations forces regular replacement and upgrades, while rising awareness of head injury and rotational-impact risks drives demand for helmets with advanced shell constructions, multi-density EPS, MIPS-like systems and improved visor locking mechanisms. At the same time, riders increasingly value aerodynamics, low weight, ventilation and noise control at high speed, pushing manufacturers to invest in wind-tunnel design, carbon and composite shells, and race-bred features. Finally, e-commerce and cross-border online retail have made a wider range of sportbike helmets accessible worldwide, reinforcing brand visibility and accelerating upgrade cycles as new models and designs are released. This report studies the global Sportbike Helmet production, demand, key manufacturers, and key regions.
