Abstracts

The global Sports Mouthguards and Lipguards market size is expected to reach \$ 629.5 million by 2029, rising at a market growth of 6.2% CAGR during the forecast period (2023-2029).

The sports mouthguards and lipguards market is expected to witness significant growth in the coming years. This can be attributed to the increasing awareness about dental injuries among athletes and the growing adoption of protective gear in sports activities. North America is expected to dominate the market due to the high participation in sports activities and the presence of major sports leagues. The increasing focus on player safety and the implementation of regulations mandating the use of mouthguards in certain sports contribute to the market growth. Europe is also witnessing significant growth in the sports mouthguards and lipguards market. The increasing popularity of contact sports and the rising number of sports-related injuries drive the demand for protective gear. Asia Pacific is expected to grow at a rapid pace due to the increasing participation in sports activities, especially in countries like China and India. The growing disposable income and rising awareness about dental injuries further contribute to market growth. The sports mouthguards and lipguards market is highly fragmented with the presence of several players. However, some key players dominate the market, including Shock Doctor and Nike. These companies have a strong distribution network and offer a wide range of products, catering to the needs of different sports. The development of innovative materials and technologies for mouthguards and lipguards presents significant opportunities in the market. For instance, the introduction of custom-fit mouthguards using 3D printing technology provides a better fit and comfort for athletes. Increasing awareness about the importance of mouthguards in preventing dental injuries creates opportunities for market growth. Educational campaigns and initiatives by dental associations and sports organizations can further drive the demand

for protective gear. Despite the growing awareness, there is still a lack of knowledge among athletes, coaches, and parents about the importance of mouthguards. This poses a challenge in market penetration and adoption. Custom-fit mouthguards can be expensive, limiting their affordability for some athletes. The high cost of these products can hinder market growth, especially in developing regions. Overall, the sports mouthguards and lipguards market is expected to witness steady growth in the coming years, driven by increasing awareness, technological advancements, and the growing emphasis on player safety in sports activities.

This report studies the global Sports Mouthguards and Lipguards production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Sports Mouthguards and Lipguards, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year. This report explores demand trends and competition, as well as details the characteristics of Sports Mouthguards and Lipguards that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Sports Mouthguards and Lipguards total production and demand, 2018-2029, (K Units)

Global Sports Mouthguards and Lipguards total production value, 2018-2029, (USD Million)
