A spray gun air cap (or air shield) is an accessory for spray guns that optimizes air flow and paint atomization during the spraying process. It regulates the air flow and direction at the spray gun outlet, ensuring that the paint is evenly applied to the target surface, and reducing overspray and uneven coating. The design of the air cap can affect the spray pattern, coating thickness, and final surface quality, and it is widely used in automotive refinishing, furniture coating, and other painting tasks.
