Spray-on bed liners are protective coatings applied directly to the bed of a truck, forming a durable, seamless layer that guards against abrasion, corrosion, and impact damage. Made from materials such as polyurethane or polyurea, spray-on liners are applied using specialized equipment, which allows the coating to bond tightly to the truck bed surface, creating a water-resistant and UV-stable shield. These liners are popular for their long-lasting performance, customizability, and ability to conform perfectly to the contours of the truck bed, providing a tailored, non-slip surface that enhances cargo stability.
