Abstracts

According to our (Global Info Research) latest study, the global Sprayable Elastomers market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

Sprayable Elastomers are used for heavy-duty industrial applications where elastomeric coatings/linings are specified. Polyurethane and polyurea elastomers are exceptionally tough and flexible to compensate for the movement and cracking of substrates – particularly concrete.

Based on the product type, sprayable elastomers market is divide into polyurethane elastomers and polyurea elastomers. A polyurea is a polymer based on the reaction of an isocyanate with a polyamine. It is mixed at high temperature (around 80°C) to initiate rapid polymerization. The resulting polymer is highly elastomeric – that is, it has a high capacity to deform (stretch) and recover.
