A stage lifting system is a type of electromechanical equipment installed in theaters, concert halls, concert stages, television studios, and large event venues to achieve the vertical lifting, rotation, movement, and transformation of stage platforms, actors, scenery, lighting equipment, etc. The system typically consists of a lifting platform, hydraulic/electric drive unit, control system, sensors, and safety locking mechanism, enabling precise, smooth, and low-noise stage mechanical movements. The average price of this product is approximately US\$50,000 per unit, with global sales of approximately 12,000 units. The stage lifting system is the 'mechanical heart' of modern stage performances, providing efficient stage transformations and visual effects for concerts, theaters, and large events through precise and safe lifting and movement capabilities.
