A stainless steel electric can opener is a motorized, automatic kitchen appliance designed to open food cans with key components constructed from stainless steel. The device employs an electric gear motor to rotate the can or drive a cutting wheel around the lid perimeter, replacing manual cranking with hands free, one touch operation. In 2025, global stainless steel automatic electric can opener production reached approximately 7,083K unit, with an average global market price of around USD 15 per unit. A factory gross profit of USD 5.25 per unit with 35% gross margin. A single line full machine capacity production is around 130K unit per line per year. The upstream is dependent on stainless steel, electric motors and packaging materials. The downstream demand is concentrated in household, commercial kitchens and foodservice. An automatic can opener is used in a large scale pet food manufacturing to open hundreds cans of meat based ingredients integrated with conveyor system and remote monitoring. US market is driven by high consumer awareness, a high standard of living, and an aging demographic favoring accessible, ergonomic kitchen gadgets. China and India market also increase due to adoption of Western lifestyle cooking habits.
