Abstracts

The global Stainless Steel Clean Floor Drain market size is expected to reach \$ 280 million by 2032, rising at a market growth of 5.9% CAGR during the forecast period (2026-2032).

Stainless steel cleanroom floor drains are drainage components made of 304 or 316L stainless steel, designed for high-hygiene environments. They typically feature easy cleaning, rounded corners, removable water seals/filter baskets, corrosion resistance, and prevention of odor backflow. They are suitable for cleanrooms, pharmaceutical plants, food processing plants, and laboratories.

Upstream components mainly include 304/316L stainless steel sheets and fittings, seals, filter baskets/water seal assemblies, and surface treatment materials. Downstream components primarily cover pharmaceutical cleanrooms, food and beverage factories, hospitals and laboratories, commercial kitchens, and other industrial and public places with high hygiene and drainage requirements. The global price of a stainless steel cleanroom drain is \$83 per unit, with annual sales of approximately 2.2 million units and a global production capacity of 3 million units. The industry profit margin is 20%.
