Abstracts

The global Stainless Steel Grinding Rods market size is expected to reach \$ 1540 million by 2032, rising at a market growth of 5.5% CAGR during the forecast period (2026-2032).

Global sales of stainless steel grinding rods reached 293,000 tons in 2025, with an average price of \$3,526 per ton.

Steel Grinding Rods are used in metallurgy and mining for grinding the ores such as iron, copper, and gold. It is used for the processing of extracted minerals. It can be used for grinding coke and friable non-metals.

The raw materials for stainless steel grinding bars are mainly austenitic or martensitic stainless steel wire rods/hot-rolled black bars such as 304, 316L, and 630. The external purchase price from steel mills in Q4 2024 was approximately RMB 15-18/kg (304) and RMB 22-25/kg (316L), accounting for 55-60% of the finished product cost. Subsequent processing steps?peeling, cold drawing, centerless grinding, polishing, and straightening?cost approximately RMB 8-10/kg. Of this, abrasives (brown corundum, magnetic needles), cutting fluid, and electricity consumption account for 30% of the processing cost, while equipment depreciation and labor account for 70%. The ex-factory price of the finished product is approximately RMB 18-23/kg for 304 material with a diameter of ?20-80mm and approximately RMB 25-29/kg for 316L.
