According to our (Global Info Research) latest study, the global Stainless Steel Multistage Pump market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

The stainless steel multi-stage pump housing is made of stainless steel. Multiple impellers are installed on a pump shaft and connected in series to work together. When the liquid passes through each impeller in turn, the energy increases sequentially under the action of centrifugal force, and finally the highest head is obtained. The stainless steel multistage pump is mainly composed of four parts: stator, rotor, bearing and shaft seal. The main causes of vibration during operation are loose bolts and unbalanced rotor. The solution is to tighten the bolts and align the bearings.
