The global Stainless Steel Pizza Cutter market size is expected to reach $ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

A stainless steel pizza cutter is a knife used to divide pizza. There are two main types of pizza cutters, one of which is a roller-shaped design. The blade is on the edge of the round steel sheet. When in use, the blade is pressed on the pizza, and then the round blade is rolled back and forth on the pizza to roll out a straight line. The pizza can be cut open, and this smaller pizza knife is often used as a utensil for cutting pizza. Another type of pizza knife has a half-moon-shaped design. The blade is located on the outside of the half-moon-shaped steel sheet. There are handles on both sides of the half-moon. When using the knife, press the knife on the pizza, and then swing the knife left and right along the curved blade to cut the pizza. , This pizza knife is larger and heavier than the roller shape, but has a higher cutting efficiency, and is usually used in the kitchen of a pizza shop.
