Stainless steel tubes are hollow cylindrical structures made from stainless steel, which is an alloy of iron with a minimum of 10.5% chromium content. Stainless steel tubes are known for their excellent corrosion resistance, durability, and high strength-to-weight ratio. They come in various shapes and sizes, including round, square, rectangular, and oval. Stainless steel boards, also known as stainless steel sheets or plates, are flat sheets of stainless steel with various thicknesses. They are manufactured through a process of hot rolling, cold rolling, or other methods. Stainless steel boards exhibit similar properties to stainless steel tubes, including corrosion resistance, durability, and strength.

The market for stainless steel tubes and boards is substantial and has been growing steadily due to the widespread use of stainless steel in various industries. Such as automotive, Construction and Infrastructure
