Abstracts

The global Stainless Steels Resin Coated Sand market size is expected to reach \$ 2245 million by 2032, rising at a market growth of 3.8% CAGR during the forecast period (2026-2032).

Stainless Steels Resin Coated Sand is a special casting material in which ordinary quartz sand is coated with a layer of solid resin film. It combines the high strength, low gas evolution, and excellent collapsibility of coated sand, and is specifically used for manufacturing cast iron and cast steel parts with high surface quality requirements and complex structures, such as automotive cylinder blocks and valves. Its main purpose is to obtain castings with precise dimensions, good surface finish, and ease of machining. The upstream segment mainly consists of raw sand mining, synthetic resin manufacturing, and auxiliary material production. Due to the extremely high casting temperature of stainless steel, the refractory properties of the raw sand are crucial. Besides high-purity quartz sand, this also involves special raw sands such as bauxite sand (ceramic sand), chromite sand, or zircon sand.

Global sales are projected to be approximately 6 million tons in 2025, with an average market price of around US\$280 per ton. The industry's gross profit margin is between 15% and 30%.

The steady growth of the stainless steel coated sand market is primarily driven by the continuous demand for complex and precision castings from downstream high-end manufacturing industries. With the increasing demands of the automotive industry (especially for turbocharger housings and exhaust manifolds), the coated sand process demonstrates a strong competitive advantage due to its lower cost compared to investment casting and higher precision compared to traditional sand casting.

At the same time, the lightweighting trend in new energy vehicles has led to an increase in the application of thin-walled stainless steel components, which directly drives the technological advancement of high-strength, thin-shell coated sand.

This report studies the global Stainless Steels Resin Coated Sand production, demand, key manufacturers, and key regions.
