Stair climber dollies are specialized carts designed for ascending and descending stairs, enabling the transportation of loads without manual lifting. Their utility is evident in locations with steps or elevated surfaces. Unlike regular carts, stair climber dollies feature three wheels, with the third wheel rotating to facilitate easy stair climbing. Electric models further ease the transport of heavy loads. These dollies vary in design, including caterpillar-type and foldable models.

Stair climber dollies are widely used in factories, warehouses, and areas lacking elevators, making them invaluable for transporting goods up and down stairs. They are especially beneficial in narrow residential complexes or buildings without elevators, aiding in the safe transport of bulky items like appliances. Additionally, they're useful for loading and unloading items onto trucks when step heights align.
