Standardized cork packaging is a kind of environmentally friendly packaging material made of natural cork through standardized cutting, molding and surface treatment processes, with excellent air tightness, moisture resistance, buffering performance and degradable characteristics. It is widely used in wine sealing, cosmetic packaging, high-end gift packaging and precision instrument protection packaging fields. Market growth is mainly driven by the upgrading of high-end consumer goods industry and the popularization of green environmental protection concepts. Consumers and brands pay more attention to packaging texture, environmental protection performance and sustainable attributes, and natural cork packaging completely meets the market demand for low-carbon and high-grade packaging. In addition, the standardized production mode realizes unified specifications and interchangeable installation, which reduces enterprise packaging costs. In the future, standardized cork packaging will further enrich product specifications, optimize surface anti-oxidation and anti-fouling treatment processes, expand application fields from traditional wine packaging to daily chemicals, electronic products and handicraft packaging, and become an important green packaging category in the high-end packaging market.
