A starting gun, also known as a starter pistol or blank gun, is a firearm specifically designed for firing blanks or cartridges with no projectile. It is commonly used to signal the start of races, particularly in sports such as track and field.

Starting gun are loaded with blanks, which are cartridges that contain gunpowder but no bullet. The primary purpose of a starting gun is to produce a loud and distinctive sound that can be easily heard by participants and spectators. When fired, they produce a loud noise and a flash of light, signaling the beginning of an event. Some starting guns are designed with features to enhance visibility, such as bright colors or reflective materials, making them easily identifiable by officials and participants.
