## Abstracts

According to our (Global Info Research) latest study, the global Static Avalanche Barrier market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

**Avalanche Barrier:** The main part of the avalanche barrier is based on high-strength steel mesh that extends across the slope to the snow surface. The support created by the holding surface prevents climbing into the snow and the snow sliding on the terrain surface. Thus, the occurrence of avalanches is prevented in the triggering zone and the resulting snow movement is limited to harmless areas. The force generated by the snow pressure is absorbed by the snow net and transferred to the anchor point through the swivel post and anchor rope.
