Abstracts

The global Static Var Compensator and Static Var Generator market size is expected to reach \$ 2291 million by 2032, rising at a market growth of 4.6% CAGR during the forecast period (2026-2032).

A static VAR compensator is a set of electrical devices for providing fast-acting reactive power on high-voltage electricity transmission networks. SVCs are part of the Flexible AC transmission system device family, regulating voltage, power factor, harmonics and stabilizing the system. A static VAR compensator has no significant moving parts (other than internal switchgear).

SVG is also called STATCOM is a shunt device, which uses force-commutated power electronics (i.e. GTO, IGBT) to control power flow and improve transient stability on electrical power networks. It is also a member of the so-called Flexible AC Transmission System (FACTS) devices. The STATCOM basically performs the same function as the static var compensators but with some advantages.

Global Static Var Compensator and Static Var Generator key players include ABB, Siemens, Rongxin Power Electronic, Sieyuan Electric, etc. Global top four manufacturers hold a share about 50%.

China is the largest market, with a share over 35%, followed by United States and Europe, both have a share over 30 percent.

In terms of product, SVG is the largest segment, with a share over 60%. And in terms of application, the largest application is Electric Utilities, followed by Renewable Energy, Industrial & Manufacturing, etc.
