Abstracts

The global Steam Jet Heat Pump market size is expected to reach \$ 815 million by 2032, rising at a market growth of 4.7% CAGR during the forecast period (2026-2032).

A steam jet heat pump is a heat recovery system that utilizes high-pressure steam to eject and compress low-grade waste heat or secondary steam, upgrading it into reusable thermal energy. This equipment significantly improves steam utilization efficiency and reduces industrial energy consumption, and is widely used in chemical, food processing, pharmaceutical, papermaking, and district heating industries. The upstream of the steam jet heat pump industry chain includes key components such as nozzles, diffusers, stainless steel housings, valves, and control systems; the midstream involves system design, system integration, manufacturing, and testing; and the downstream serves industrial enterprises requiring energy-saving renovations and waste heat recovery, providing installation, commissioning, and maintenance services. In 2025, the global production of steam jet heat pumps was approximately 16,300 units, with a global average market price of approximately US\$35,000 per unit. The gross profit margin of major companies in the industry ranged from 40% to 55%. The global production capacity of steam jet heat pumps in 2025 was approximately 20,000 units.

The steam jet heat pump market is driven by increasing demand for industrial energy efficiency and carbon emission reduction. As energy costs rise, manufacturers are adopting waste heat recovery technologies to optimize steam utilization and lower operating expenses. Steam jet heat pumps provide a cost-effective and reliable solution compared with conventional mechanical heat pumps, especially in high-temperature industrial environments. Technological improvements in nozzle design and system integration enhance performance and durability. With global policies supporting energy conservation and sustainability, the market is expected to experience steady growth

across chemical, food, and pharmaceutical industries.
