The global Steam Valve market size is expected to reach \$ 10390 million by 2032, rising at a market growth of 1.8% CAGR during the forecast period (2026-2032).

Steam Valves are used in steam system to adjust or switch steam flow, filter impurity in steam, prevent steam backflow, etc. Steam valves include a lot of valves like steam trap valves, steam plunger valves, steam reducing valves, safety valves, etc.

First, for industry structure analysis, the Steam Valve industry is not concentrated. These manufacturers range from large multinational corporations to small privately owned companies compete in this industry. The top five producers include Emerson, Pentair, Flowserve, Spirax Sarco and Armstrong, account for about 17% of the revenue market. Regionally, North America is the biggest production value area, also the leader in the whole Steam Valve industry.

North America occupied 26% of the production market. It is followed by Europe and China, which respectively account for around 24% and 24% of the global total industry. Other countries have a small amount of production. Geographically, North America was the largest consumption market in the world, which took about 25% of the global consumption volume.

This report studies the global Steam Valve production, demand, key manufacturers, and key regions.
