According to our (Global Info Research) latest study, the global Steckel Mills market size was valued at USD 396.2 million in 2023 and is forecast to a readjusted size of USD 492.6 million by 2030 with a CAGR of 3.2% during review period.

A Steckel mill, also known as a reversible finishing mill, is similar to a reversing rolling mill except two coilers are used to feed the material through the mill. One coiler is on the entrance side and the other on the exit side. The coilers pull the material through the mill, therefore the process is more similar to drawing than rolling. The material is fed back and forth through the mill until the desired thickness is reached, much like a reversing rolling mill.
