Steel lattice tower is a type of lattice tower that is made of steel and is used for a variety of applications, including telecommunication, power transmission, and meteorological monitoring. These towers consist of a framework of steel angles or tubular sections that are bolted or welded together to form a lattice structure. The lattice design provides high strength-to-weight ratio, allowing the tower to be both strong and lightweight. The towers are typically designed to withstand harsh weather conditions and are built to be durable and long-lasting.
