According to our (Global Info Research) latest study, the global Steel PDC Drill Bit market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

PDC drill bits are called diamond drill bits. This drill bit is an integrated drill bit with no moving parts, a relatively simple structure, and the ability to resist impact. It was one of the three new drilling technologies in the world in the 1980s. On site use has proven that diamond drill bits have advantages such as fast speed, more footage, long service life, stable operation, fewer downhole accidents, and good wellbore quality when drilling in soft to medium hard formations. Diamond drill bits not only have a long usage time, but can also be reused. The diamond drill bits that are returned to the factory for repair have similar usage effects as the diamond drill bits from the factory, which can greatly save drilling costs.
