According to our (Global Info Research) latest study, the global Steel Plate market size was valued at USD 62650 million in 2023 and is forecast to a readjusted size of USD 69680 million by 2030 with a CAGR of 1.5% during review period.

Steel Plate is simply steel sheet material that can be customarily cut and welded to develop a more elaborate product. It is made by compressing multiple steel layers together into one; forming a plate of steel. Steel Plate is commonly used to strengthen foundations and uphold mass units of weight like bridges. Alternatively, it provides a base for construction of larger materials and non-workable parts. Steel Plate is both corrosion and abrasion resistant. It is manufactured to a much broader range of thicknesses than ordinary steel sheet. Plate steel is primarily used in applications where super-structural framework and indestructible durability is required.

The major players in global Steel Plate market include Tisco, Arcelormittal, EVRAZ, etc. The top 3 players occupy about 20% shares of the global market. North America and China are main markets, they occupy about 60% of the global market. Cold Rolled Steel Plate is the main type, with a share about 60%. Construction is the main application, which holds a share about 50%.
