## Abstracts

The global Steel Strand for Bridge Cables market size is expected to reach \$ 7632 million by 2032, rising at a market growth of 5.0% CAGR during the forecast period (2026-2032).

In 2025, global sales of steel strand for bridge cables reached 2.85 million tons, with an average selling price of US\$1,850 per ton. Steel strand for bridge cables is a high-strength structural material formed by stranding multiple high-strength steel wires together in a specific structure after drawing, surface treatment, and typically using a 7- or 19-wire structure. Its corrosion resistance is enhanced through processes such as hot-dip galvanizing, zinc-aluminum alloy coating, or epoxy coating. It is widely used in the main cables, suspenders, and cable systems of suspension bridges, cable-stayed bridges, arch bridges, and long-span bridges. Its core function is to provide high strength load-bearing capacity, fatigue resistance, and weather resistance in long-term service environments. The production process mainly includes wire drawing, heat treatment stabilization, surface anti-corrosion treatment, and stranding, requiring high material purity and mechanical properties. The industry's total global production capacity is approximately 3.5 million tons per year, with an overall gross profit margin of approximately 18%-25%. The main upstream raw materials are high-carbon steel wire rod, zinc ingots, aluminum alloys, epoxy resin, and lubricating oil, while the downstream applications are mainly in cross-sea bridges, mountain highway bridges, urban expressway bridges, and large-scale infrastructure projects. With the upgrading of global transportation infrastructure, the construction of cross-sea channels, and the increasing demand for maintenance of aging bridges, the demand for high corrosion-resistant steel strand, epoxy-coated steel strand, and ultra-high-strength steel strand continues to grow. There is still significant demand growth and industry opportunities in the fields of marine engineering bridges, ultra-long-span bridges, and prefabricated

bridge construction.
