According to our (Global Info Research) latest study, the global Sterile Isolator market size was valued at USD 494.1 million in 2022 and is forecast to a readjusted size of USD 1015.7 million by 2029 with a CAGR of 10.8% during review period.

Sterile isolator is completely sealed to control and process pharmaceuticals and biological products to a sterile state. A complete operating process may require a system of several isolators to completely separate the entire process from possible sources of contamination such as surrounding equipment and operators.

The design of isolators is to create an airtight barrier or enclosure around a piece of equipment or process which provides outright separation between the operator and product. The operator can execute tasks through half-suits or glove ports.

Global key players of Sterile Isolator include Getinge, Shibuya Corp, SKAN, Tofflon and Bioquell, etc. The top five players hold a share over 45%. Europe is the largest market, has a share about 40%. In terms of product type, Sterility Production Isolator is the largest segment, occupied for a share of about 70%, and in terms of application, Pharmaceutical Industries has a share about 95 percent.
