Stern Tube Seal Service refers to the professional maintenance, repair, overhaul, and inspection activities performed on stern tube sealing systems used in marine vessels. These services are essential for ensuring the reliability, operational efficiency, and environmental compliance of the propulsion system by preventing seawater ingress and oil leakage at the propeller shaft interface. Regular servicing of stern tube seals extends equipment lifespan, minimizes the risk of unplanned downtime, and helps ships meet strict regulatory standards, including those set by IMO and classification societies. Comprehensive stern tube seal services include condition assessments, seal ring replacement, housing inspection, oil analysis, leakage diagnostics, and retrofitting of upgraded seal solutions.
