Stiffening Agent is a chemical substance used to increase the stiffness of fabrics or papers. In the manufacturing process of textiles and papers, Stiffening Agent is sometimes used to improve the quality and appearance of the materials.

Stiffening Agent is typically a polymer that can form chemical bonds with the surface of fibers or papers. These chemical bonds can increase the hardness and rigidity of the materials, making them more durable and tough.

Stiffening Agent can also be used in the production of some handicrafts, such as paper sculpture and cardboard making. In these applications, Stiffening Agent is applied to the surface of the paper and forms a hard shell after drying, making the handicrafts more sturdy and durable.
