Abstracts

According to our (Global Info Research) latest study, the global Stock Music market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Stock Music (also known as royalty free music) is a less expensive alternative to the use of popular or well known music in a production. It is less expensive because you don't have to obtain special permission or pay additional clearance fees for the use of a song that has instant recognition. Obtaining permission to use a popular piece of music that has been released by a pop star in your production can cost a bundle.

Stock Music, on the other hand, has been written especially for use in audio and audio visual productions like radio and television broadcasts, commercials and jingles, motion picture and video scores and soundtracks, corporate & training presentations, Web sites, computer games, software applications and multimedia.
