A straight stitch sewing machine is a type of sewing machine that is specifically designed for creating straight stitches. It is a basic and essential type of sewing machine commonly used for various sewing projects. Unlike more advanced machines with multiple stitch options, this type of machine only has a single straight stitch setting. The primary function of them is to sew two pieces of fabric together using a straight stitch. This type of stitch is formed by a single thread passing through the fabric in a straight line, creating a simple and neat seam. Straight stitches are commonly used for basic sewing tasks such as seaming, hemming, topstitching, and general stitching purposes. These machines are often preferred for their simplicity, durability, and ease of use. They are suitable for beginners and experienced sewists alike, as they provide a reliable and straightforward stitching option. These machines typically have a basic design, featuring a single needle and a foot pedal or a button for controlling the stitching speed.
