The global Straight-Through Globe Valve market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

The straight-through stop valve has the characteristics of simple structure, fluid control, sealing performance, pressure resistance and short opening and closing time. It is widely used in pipeline systems in petrochemical, electric power, water treatment, pharmaceutical and other industries for cutting and controlling. The flow of fluid ensures the normal operation of the system.

The straight-through globe valve is a common valve that allows fluid to pass directly through the valve without changing the flow direction. The stop valve is mainly used to cut off the flow of fluid and play the role of opening and closing pipelines.
