The global Strapping Machines market size is expected to reach \$ 3477 million by 2032, rising at a market growth of 4.8% CAGR during the forecast period (2026-2032).

Strapping machines are various types of equipment that perform the action of bundling together products or parts by way of a strap or several straps that fasten an item to a material handling product, usually a pallet. Strapping is performed for many applications, including the reinforcement of packaging, which is the primary method of fastening products to a pallet. Strapping is also used as a method of combining many small products into one large bundle for easier material handling purposes.

Global Strapping Machines main players are Signode, Samuel Strapping, Baosteel, Anshan Falan, etc. Global top four manufacturers hold a share about 35%. China is the largest market, with a share about 45%.
