According to our (Global Info Research) latest study, the global Steel Wind Tower market size was valued at USD 7429.6 million in 2023 and is forecast to a readjusted size of USD 9356.8 million by 2030 with a CAGR of 3.3% during review period.

The tower is an important element in the structure of a wind turbine. It transmits loads from the nacelle to the foundation and is a significant factor in determining profitability: the higher the tower, the higher the energy output. Depending on the specific needs of a given project, we supply different tower types.

The tubular steel tower is a proven concept that delivers short installation time, optimized logistics, and excellent cost efficiency. Steel segments with a diameter of up to six meters are stacked and joined at the construction site. Tubular steel towers can reach more than 100 meters in height.

The major players in global Tubular Steel Wind Tower market include Trinity Structural Towers, Titan Wind Energy, CS Wind Corporation, Dajin Heavy Industry, etc. The top 4 players occupy about 20% shares of the global market.
