The straw baler is an agricultural machine that is mainly used to collect straw in the field and bundle it into bales for transportation, storage or subsequent processing. The equipment efficiently organizes the straw scattered in the field into compact bales through the steps of picking, compressing and bundling. It is often used for the recycling of straw of crops such as corn, wheat and rice. The straw baler not only improves the efficiency of straw collection, but also reduces labor intensity, promotes the resource utilization of straw, and meets the requirements of sustainable development of modern agriculture.
