Abstracts

A street light, light pole, lamppost, street lamp, light standard, or lamp standard is a raised source of light on the edge of a road or path. When urban electric power distribution became ubiquitous in developed countries in the 20th century, lights for urban streets followed, or sometimes led. Many lamps have light-sensitive photocells that activate automatically when light is or is not needed: dusk, dawn, or the onset of dark weather. This function in older lighting systems could have been performed with the aid of a solar dial. Many street light systems are being connected underground instead of wiring from one utility post to another.

Scope of the Report:

This report focuses on the Street Lighting in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The global street lighting market is expected to witness considerable growth in the coming years due to the rising support from the governments of several countries across the globe. Government initiatives such as subsidies and discounts for the adoption of solar lighting help improve the living conditions of individuals. Countries in Asia and Africa have already introduced several schemes to improve street lighting. Moreover, there is also in increased partnership between international organizations, local governments, and regional NGOs to improve street lighting systems, which will subsequently drive the growth of the market.

APAC accounted for the largest street lighting market share during 2017. The availability of government incentives in countries such as China and India to promote

energy-efficient lighting and the presence of the several LED chip and packaging factories in the region, will propel the growth of the market in APAC.

The worldwide market for Street Lighting is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
