## Abstracts

The global Stripping Eductor market size is expected to reach \$ 886 million by 2032, rising at a market growth of 6.8% CAGR during the forecast period (2026-2032).

In 2025, global Stripping Eductors approximately 172,241 units, with an average global market price of around US\$ 3,274 per unit. Gross margin is about 44%. The cost is 1,833 usd. The Production is about 200,000 units. Stripping Eductor is a jet-driven suction device that uses a high-velocity motive fluid (water, liquid cargo, steam, or compressed gas) to create a vacuum for stripping, draining, and removing residual liquids from tanks, pipelines, or process equipment, without any moving parts. It is valued for its simplicity, reliability, and suitability for hazardous or corrosive environments. Upstream, stripping eductors depend on precision nozzle and venturi design, metallurgy (carbon steel, stainless steel, duplex, Cu-Ni alloys), casting/machining, and pressure-rated piping components. Downstream, they are widely deployed in marine and offshore systems (cargo/ballast tanks), oil & gas and chemical plants (tank bottoms and process draining), tank farms, water & wastewater facilities, and power/utilities, where safe, low-maintenance residual liquid removal is required.

This report studies the global Stripping Eductor production, demand, key manufacturers, and key regions.
