A stucco wall is a wall finish created by applying a layer of plaster, which is a mix of slaked lime, sand, and glue. The plaster is enhanced with hemp and other materials to prevent cracking and is kneaded with water before application. Plaster walls have been a globally used technique for over 5,000 years.

Stucco walls are utilized both in interior and exterior applications in homes and public facilities. Due to their natural, beautiful finish, they are particularly popular for interior walls. They can be colored with various dyes, making them versatile for different design preferences.
