Abstracts

A stylus is an instrument with a round rubber part that is used to point, sign, slide and draw on the touch screen of an electronic device. This pen is designed to provide students with hands-on experience and fascinate them with digital art and notes. Features such as natural writing, touch sensitivity and electronic erasing make it both beneficial and easy to use. Two different ways of using modern touch screens to interact with mobile devices include fingertips and stylus (passive stylus and active stylus). Passive styluses are inexpensive and have a blunt tip, making them less precise in tasks such as taking notes and drawing, while active styluses are sensitive to pressure, allowing users to draw thin lines with higher accuracy.
