## Abstracts

A submarine is an underwater naval platform that can stay submerged for extended periods and is deployed for multiple defense functions. It is considered crucial for a nation's maritime security and is used for both offensive and defensive purposes. Submarines are designed for greater agility and stealth capabilities. These vessels are armed with powerful weapons such as missiles and torpedoes.

Scope of the Report:

This report focuses on the Submarine in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The growing demand for unmanned underwater vehicles (UUVs) has been a key growth driver for this market. UUVs have extensive applications in naval intelligence, mine countermeasures operations, surveillance and reconnaissance, and anti-submarine warfare missions. In maritime operations, UUVs are primarily designed for underwater surveillance, hull inspection, dock inspections, and underwater mines deactivation. Also, these UUVs are fitted with high-definition cameras that send visual data from the UUV to the operator. With better images and improved control of the vehicle, a better inspection of the underwater environment is possible which aids in naval operations. Recently, there has been an increased usage of these unmanned vehicles for electronic attack, communication transfer, combat, search, and rescue missions, and C4ISR operations. Thus, the increasing activities related to seabed mapping and mining will propel the market for submarines during the forecast period.

The Americas dominated the market, accounting for more than 40% of the market

share. Factors like high military spending and increasing focus the Virginia-class submarine program will contribute to strong demand for submarines in the region.

The worldwide market for Submarine is expected to grow at a CAGR of roughly 4.4% over the next five years, will reach 27800 million US\$ in 2023, from 21400 million US\$ in 2017, according to a new GIR (Global Info Research) study.
