## Abstracts

Several countries across the world are focusing to develop advanced submarine warfare. Stealth submarines and UUVs have emerged as the most viable means of gathering intelligence, which has made them a crucial component of current and future military operational plans. The submarines and other undersea vehicles have improved their stealth and lightweight properties due to extensive R&D, extensive use of technology, and high-fidelity training. Such transformations have changed the degree of naval warfare. With greater investments and R&D, the introduction of stealth submarine poses a threat to efficient detection, tracking, and distance-measuring systems.

### Scope of the Report:

This report focuses on the Submarine Payload and Launch Systems in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Factors such as extensive investments in the development and installation of command, control, communications, computers, intelligence, surveillance, and reconnaissance (C4ISR) systems, missiles, radars, and sensors on the submarines by countries such as the US, Russia, China, India, Iran, Japan, South Korea, Turkey, and the UK are driving the growth of submarine payload and the launch systems. There has been an increase in the installation of such systems on the submarines across the globe because of the increasing need for intelligence, surveillance, and reconnaissance (ISR) and communication by the defense authorities globally. Several countries are modernizing their naval defense units by manufacturing submarines, surface-mine

countermeasure unmanned underwater vehicles (UUVs), and other combat and tactical UUVs. The increase in the number of these assets will simultaneously boost the global development of submarine payloads and launch systems.

The worldwide market for Submarine Payload and Launch Systems is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
