Substance abuse has become a major cause of concern. People are increasingly getting addicted to a variety of drugs, affecting their health and their family life to a large extent. With prolonged drug and alcohol abuse, the prevalence of mental illness and various chronic diseases, such as diabetes and cardiovascular disorders, have increased substantially among consumers, creating a high economic burden on the nation.

Scope of the Report:

This report studies the Substance Abuse Treatment market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Substance Abuse Treatment market by product type and applications/end industries.

The rise in government initiatives for improved awareness is identified as one of the primary growth factors for this market. Various programs and initiatives have been set up by government agencies and many organisations to increase awareness about the chronic ill-effects of substance abuse. These include initiatives taken up at work places, community programs, and technical assistance programs at local, state, and national levels. The Substance Abuse and Mental Health Services Administration (SAMHSA), a branch of the U.S Department of Health and Human Services has multiple programs to improve awareness. SAMHSA's Division of Workplace Programs (DWP) supervises programs to eradicate illicit drug use in federal workplaces and helps all workplaces become drug-free. Under this program, DWP regulates various policies for a drug-free workplace.

The Americas is expected to be the major revenue contributor to the market throughout the forecast period. The rise in number of people with addiction and the rise in the number of rehabilitation centers will be the major factors propelling the growth of the substance abuse treatment market in this region.
