## Abstracts

According to our (Global Info Research) latest study, the global Sucralfate API market size was valued at US\$ 61.27 million in 2025 and is forecast to a readjusted size of US\$ 80.06 million by 2032 with a CAGR of 3.6% during review period.

In 2025, global Sucralfate API production reached approximately 4,971 tons, with an average global market price of around US\$11,980 per ton. Sucralfate API is a gastric mucosal protectant, chemically known as aluminum sucrose sulfate. As a white or off-white powder, it is nearly insoluble in water. In gastric acid, it dissociates into negatively charged sucrose sulfate complex ions, binding to ulcer surface proteins to form a protective film that prevents erosion by gastric acid and pepsin, used for treating gastric ulcers and gastritis.

The global Sucralfate API market is undergoing steady expansion, driven by the increasing prevalence of gastrointestinal disorders and global demographic aging. The rising prevalence of gastrointestinal (GI) disorders, specifically peptic ulcers, gastroesophageal reflux disease (GERD), and stress-related mucosal injuries, serves as a primary demand catalyst. Official health statistics indicate that dietary shifts, lifestyle-induced stress, and the continued prevalence of *Helicobacter pylori* infections maintain a steady requirement for effective mucosal protectors. As diagnostic capabilities expand in emerging economies, the identified patient pool requiring therapeutic intervention continues to grow globally.

Zhejiang Haisen Pharmaceutical, Archimica, Elementis Pharma, Northeast Pharmaceutical Group, Nanjing Pharmaceutical Factory are the top five manufactures in the global Sucralfate API market. The production landscape is moderately concentrated, with the top five global manufacturers commanding approximately 57.70% of the total

market share in 2025. Tier-1 players, predominantly located in China, India, and Europe. Zhejiang Haisen Pharmaceutical is the largest manufacturer, its revenue share of global market reached 27.33% in 2025.

Geographically, APAC is the largest consumer of Sucralfate API. The follower is Europe. In 2025, these two regions together accounted for 74% of the global market share.

In terms of types, ChP Grade occupied the largest sales share of 36.81% in 2025. Based on the application, Sucralfate API is used to produce sucralfate drugs, including tablets, suspensions, oral solutions, oral powders, and ointments. The sucralfate suspension industry is the largest application market for Sucralfate API.
