Abstracts

The global Sugar Free CBD Gummies market size is expected to reach \$ 342 million by 2032, rising at a market growth of 8.5% CAGR during the forecast period (2026-2032).

Sugar free CBD gummies are chewy confectionery products formulated with cannabidiol (CBD) as the active functional ingredient, produced by infusing CBD oil or water soluble CBD nano emulsion into a gelling matrix with total sugar content below 0.5g per serving, sweetened with sugar alcohols, stevia, monk fruit, or allulose as alternatives to traditional sucrose or corn syrup. In 2025, global sugar free CBD gummies production reached approximately 469,600 K unit, with an average global market price of around USD 400 per K unit. A factory gross profit of USD 120 per K unit with 30% gross margin. A single line full machine capacity production is around 1,000K unit per line per year. The upstream is dependent on CBD extract, gelatin and natural flavors. The downstream demand is concentrated in fitness enthusiasts, diabetics patient and health conscious adults. 10-25mg CBD per serving in gummy bear can relief stress and keto friendly. US market is propelled by widespread hemp legalization (Farm Bill) and an accelerated transition from sugary edibles to sugar-free/low-carb alternatives to suit diabetic or Keto-friendly diets. UK market is driven by pharmacy chains and mainstream health stores normalizing wellness.
