Abstracts

The global Sulfamic Acid market size is expected to reach \$ 299 million by 2032, rising at a market growth of 8.4% CAGR during the forecast period (2026-2032).

Amidosulfonic acid, also known as sulfamic acid, sulphamic acid and sulfamidic acid, is a molecular compound with the formula H_3NSO_3 . This colourless, water-soluble compound finds many applications. Sulfamic acid melts at 205 °C before decomposing at higher temperatures to water, sulfur trioxide, sulfur dioxide and nitrogen.

Amidosulfonic acid (H_3NSO_3) may be considered an intermediate compound between sulfuric acid (H_2SO_4), and sulfamide ($H_4N_2SO_2$), effectively replacing a hydroxyl ($-OH$) group with an amine ($-NH_2$) group at each step. This pattern can extend no further in either direction without breaking down the sulfonyl ($-SO_2-$) moiety. Sulfamates are derivatives of sulfamic acid.

Global key players of Sulfamic Acid include Shandong Mingda Chemical, Hebei Liuhe Chemicals, Shandong Xingda Chemical, Laizhou Jinxing Chemical, Donau Chemie, etc. The top five players hold a share about 42%. Asia Pacific is the largest market, and has a share about 62%, followed by North America and Europe with share 16% and 14%, separately. In terms of product type, Industrial Grade is the largest segment, occupied for a share of 78%. In terms of application, Cleaning Agent is the largest field with a share about 44 percent.

This report studies the global Sulfamic Acid production, demand, key manufacturers, and key regions.
